SUMMARY

With hands on experience at SAP Emarsys, and 3+ experience in programming, I am skilled in Development, RestAPI, Automation using Python, and CI/CD tools. Proven ability to deliver real-world solutions in multicultural teams. Looking forward to contribute to your organization.

EDUCATION

University of Debrecen, Hungary

BSc in Electrical Engineering (Information Technology)

Sep 2022 - Aug 2026 (ongoing)

GPA: 4.7 / 5.0

EXPERIENCE

SAP Emarsys

Sept 2025 – Ongoing

Scripting and Automation Speacialist Intern (IT Securitiy area)

Budapest, Hungary

- Automated audit evidence collection by extracting data from third-party systems, executing predefined SSH terminal commands, and capturing automatic screenshots within *Agile* and *Scrum* workflows.
- Built interactive JIRA automation scripts with selectable options and integrated screenshot generation for compliance and documentation workflows.
- Developed API endpoints directly from third-party databases to streamline data access and auditor reporting.

HUN-REN Energy Research Centre

Jan 2025 - Feb 2025

AI and Machine Learning modeling Research Intern

Budapest, Hungary

- Built a Web Application, with a backend in Flask, implementing a modular API for image analysis using pre-trained machine learning model, and ensuring a user-friendly and efficient interface.
- Engineered automation for extracting nanoparticle statistics and plots. Later generating downloadable reports.
- Maintained a responsive frontend (HTML5, CSS, Javascript + Bootstrap) for upload, preview, and visualization.
- Integrated error handling, data validation, and asynchronous processing to improve reliability and user experience.

PROJECTS

Cut and Style Salon Website | HTML5, CSS3, JavaScript(ES6+), IndexedDB, API

- A responsive web-based appointment scheduling app for a salon with features like booking, dynamic time slot management, and barber selection.
- Integrated Maps API for location, Google Authentication for secure admin access, and IndexedDB for local storage.
- Deployed as static files on Netlify with auto-HTTPS and real-time dynamic page management.

Snipp-It Chrome Extension | Python, OpenCV, Flask, JavaScript, CSS3, pyautoGUI

- An automation tool that periodically captures screenshots and compiles them into a PDF, ideal for live lectures.
- Built a Python Flask server to handle screenshot capture requests via a Chrome extension or command line.
- Utilized OpenCV and PyAutoGUI for screenshot capture, with a streamlined Windows setup using a batch script.

TECHNICAL SKILLS

Languages/Software: Python, JavaScript, Microsoft Office tools, SQL, jQuery

Developer Tools: VS Code, Azure DevOps, Linux, Git, GitLab, Jira

Technologies/Frameworks: React, Flask, Keras, Tensorflow, Scikit-Learn, OpenCV

Soft Skills: : Collaboration, Communications Skills, Analytical Problem Solving, Well Organized, Team work

LEADERSHIP / EXTRACURRICULAR

- Trainer, Erasmus+ Workshop (ELTE, Hungary) – Led sessions on eco-awareness and Artificial Intelligence.
- Participant, Erasmus+ Youth Exchange (Poland) – Promoted mental health and inclusion through sports.

AWARDS / CERTIFICATES

Recipient, Stipendium Hungaricum Scholarship | Tempus Public Foundation
