## SUMMARY

DevOps Engineer with hands-on experience in CI/CD pipeline automation, containerized workflows, and secure system integration in enterprise environments at SAP. Strong foundation in Linux, Python automation, Jenkins, Docker, and REST APIs, with practical exposure to audit-compliant deployments, system reliability, and production operations.

## EDUCATION

### University of Debrecen, Hungary

BSc in Electrical Engineering (Information Technology)

Sep 2022 - Jul 2026 ( ongoing )

GPA: 4.7 / 5.0

## EXPERIENCE

### SAP Emarsys

Sept 2025 – Ongoing

Scripting and Automation Specialist Intern ( Network Infrastructure Team )

Budapest, Hungary

- Designed and maintained Jenkins CI/CD pipelines for automated security updates and vulnerability scanning.
- Implemented Docker-based containerization to standardize pipeline execution across environments.
- Integrated external security scanning tools and built automated JIRA ticketing pipelines with audit evidence artifacts.
- Built Python-driven Linux automation using SSH and REST APIs, supporting compliance and audit readiness in Agile/Scrum teams.

### HUN-REN Energy Research Centre

Jan 2025 - Feb 2025

AI and Machine Learning modeling Research Intern

Budapest, Hungary

- Built a Web Application, with a backend in Flask, implementing a modular API for image analysis using pre-trained machine learning model, and ensuring a user-friendly and efficient interface.
- Engineered automation for extracting nanoparticle statistics and plots. Later generating downloadable reports.
- Maintained a responsive frontend (HTML5, CSS, Javascript + Bootstrap) for upload, preview, and visualization.
- Integrated error handling, data validation, and asynchronous processing to improve reliability and user experience.

## PROJECTS

### Enterprise Audit Evidence Automation & Orchestration Platform

- Built parameterized Python scripts that automatically fetch, process, and export evidences from multiple Jira projects (API) with configurable date ranges, organizing outputs into structured cloud folders with exports for compliance and audit trails.
- Developed declarative Jenkinsfile with daily scheduling, first-run historical data detection, multi-project orchestration, and automatic failure handling that creates Jira tickets and email notifications, enabling fully hands-off evidence collection across projects.
- Implemented comprehensive solution with environment-based configuration (.env files), Jenkins credential management, state tracking for execution history, automated setup scripts, and complete documentation.

### Automated Incident Detection & Self-Healing Infrastructure Platform

- Designed and deployed a self-healing infrastructure system using Docker, Prometheus, and Alertmanager for monitoring and alerting.
- Developed a Python-based automated remediation engine integrating Docker CLI and Ansible playbooks to handle container failures and disk threshold breaches.
- Implemented event-driven incident response workflows, improving system reliability and reducing Mean Time to Recovery (MTTR).

### Snipp-It Chrome Extension | Python, OpenCV, Flask, JavaScript, CSS3, pyautoGUI

- An automation tool that periodically captures screenshots and compiles them into a PDF, ideal for live lectures.
- Built a Python Flask server to handle screenshot capture requests via a Chrome extension or command line.
- Utilized OpenCV and PyAutoGUI for screenshot capture, with a streamlined Windows setup using a batch script.

## TECHNICAL SKILLS

---

**Languages/Software:** Python, JavaScript, Bash, Microsoft Office tools, SQL, jQuery

**Developer Tools:** VS Code, Azure DevOps, Linux, Git, GitLab, Jira, Docker, Jenkins, Ansible, Terraform

**Technologies/Frameworks:** React, Flask, Keras, Tensorflow, Scikit-Learn, OpenCV

**Soft Skills:** : Collaboration, Communications Skills, Analytical Problem Solving, Well Organized, Team work, Agile/Scrum Methodology, Kanban Boards

## LEADERSHIP / EXTRACURRICULAR

---

- Trainer, Erasmus+ Workshop (ELTE, Hungary) – Led sessions on eco-awareness and Artificial Intelligence.
- Participant, Erasmus+ Youth Exchange (Poland) – Promoted mental health and inclusion through sports.
- GILE Foundation: Helping build an online platform for young people for career guidance.

## AWARDS / CERTIFICATES

---

**Recipient, Stipendium Hungaricum Scholarship (2022-2026) | *Tempus Public Foundation***
